PROJECTS

- **To-do List:**

I developed a dynamic to-do list application in React with full CRUD functionalities (Create, Read, Update, Delete) using localhost for data management. It offers an intuitive interface for managing tasks seamlessly. VISIT | GITHUB

- **Weather App:**

I developed a weather app using React that fetches real-time weather data for any location. It displays current conditions, temperature, and other key weather details in an intuitive interface. VISIT | GITHUB

- **Expense Tracker:**

I built an expense tracker using React that allows users to add, edit, and delete expenses while tracking their total budget. The project is fully functional with all CRUD operations and runs on localhost. VISIT | GITHUB

- **Portfolio Website:**

I created a portfolio website using React to highlight my skills, certificates, projects, and education. The site features sections like "About Me", "Skills", "Projects," and a "Contact Us" form, offering a comprehensive overview of my professional profile. VISIT | GITHUB
